

## INKJET INKS FOR CERAMIC

Many customers tell us: *"I'm using ceramic inkjet inks but I'm only know that is a coloured liquid"*

The main issue in this conference is to give a simple tour around an inkjet ink and a ceramic inkjet ink:

- What's an inkjet ink?
- What's a colouring matter?
- What's a medium?
- How to make a ceramic inkjet ink?
- What parameters do we need to control?
- What we need to avoid in any ceramic inkjet ink?
- What kind of inkjet inks MEGACOLOR offers?
