

Ferhat Kara has graduated at Istanbul Technical University in 1988. He had his MSc degree from the University of Leeds in 1990 and PhD degree from the University of Cambridge in 1994. Since then, he has been working in the Department of Materials Science and Engineering of Anadolu University/Turkey. Between 1998-2010, he served as the director of Ceramic Research Centre, university-industry joint research centre founded by Anadolu University and Turkish ceramic manufacturing companies. He founded MDA Advanced Ceramics, a technopark company, together with his three colleagues to exploit commercially their research results, particularly on non-oxide ceramics. He has published a number of research papers and 5 patents/patent applications. His research is mainly on the processing/property improvements of ceramic materials for mechanical and functional applications.
